

ASSEMBLY MANUAL

LED02 RGB Led light option for Studio Desk

Thank you for making StudioDesk the brand of your choice!

Before beginning assembly of this LED set, let's get familiar with the parts you have received in your package. Please match the corresponding numbers on this page with the pictures.

Wooden parts

1. RGB Led Strips (2x10cm, 2x44 cm, 1x90 cm)
2. Cable divider - 1 / 5
3. Controller
4. Remote controller
5. Power adapter
6. Electric plug EU or US
7. Cable self adhesive clamp 10 pcs

LED Strips and Cable clamp's are self adhesive so you can stick it to the clean surface as per your need and desire. Led strips in 44 cm length are meant to be positioned above your racks and light your rack components. Led strips in 10 cm length are for ambience light on the back side of the desk and 90 cm stripe is to be placed to light your keyboard underneath.

Typical LED light setup

Before doing any connections, remove film from the stripe and stick it to the clean surface as per your wish. Use Cable clamp to keep cables organized.

Connection

1 Step One

Connect Led strips (1) cables to Cable divider (2)

NOTE!

Make sure that arrows on connectors point to each other as shown on the Pic (left).

2

Step Two

Connect cable divider (2) to the Controller (3).
Make sure that arrows on the connectors point to each other.

3

Step Three

Connect controller (3) to the power adapter.

4

Step Four

Connect power plug to the power adapter.
Appropriate plug is supplied (US/EU).
Connect the plug to the electricity.
Insert batteries to the remote.
Remote functions are explained in the separate user manual available on the same link.
